

Enabling your global business

Healthcare

Logistics for the healthcare industry.

An uninterrupted cold chain, continuous documentation, the secure transport of valuable pharmaceuticals: the demands that the healthcare industry place on logistics are very high – and specific. Just like the quality and diversity of the logistics solutions that we have specially customized to meet the needs of your industry. Regardless of whether you choose **Care** for dangerous goods, **Cool** for temperature-sensitive goods such as insulin or **Safe1** for particularly valuable items like donor organs – our products allow you to get your life-saving cargo to its destination, on time and intact.

Are you interested to see just what customized solutions for CT scanners, vaccines, generic drugs, donor organs, blood and plasma, and radioactive isotopes for cancer treatments can look like? Take a look at lufthansa-cargo.com/enablingglobalbusiness to see some of our customers' logistics highlights.

Secure and reliable at the highest level.

Flying can save lives.

When it comes to transporting healthcare cargo, it pays to fly.

- Flying allows for **flexible supply-chain solutions**, ensuring quick medical treatment – in emergencies, too
- **The quickest possible** processing and delivery throughout the world, guaranteed
- Airfreight provides **reliable shipment monitoring, security and documentation**

Customized solutions by Lufthansa Cargo.

Flying provides real benefits.

You can count on your valuable shipments getting to their destination reliably, securely and intact, which we ensure with customized solutions, precise temperature control, the highest security standards and more.

- **Special infrastructure:** a state-of-the-art Cool Center, where pharmaceutical shipments, classic perishables and temperature-controlled dangerous goods are stored separately
- **Temperature-stable transport:** a temperature-controlled, optimized cold chain thanks to significantly shorter transport routes and fewer interruptions during transfers, as well as temperature-controlled compartments on board most flights
- **Cool service:** a range of different cooling containers that can also be made available outside of flight and processing hours
- **Just in case:** a combination of Cool together with Care, our special product for dangerous goods, which complies with the IATA Dangerous Goods Regulations
- **Comprehensive documentation:** transparent processes with continuous shipment monitoring and password-protected shipment tracking in real time
- **Personal and competent:** teams of experts ensure that pharmaceutical and medical technology shipments are monitored and handled appropriately

Service by pros, for pros.

Flying can be so simple.

If you value quality, competence and customized logistics solutions, then we are the right choice for you.

- **More speed:** the quickest connections to over 300 destinations in 100 countries worldwide, including direct transfers and further transport on the ground
- **The highest quality worldwide:** smooth transport – through proper handling, precise timing and efficient processes at all locations
- **Reliability and transparency:** getting your cargo to its destination safely and on time and tracking it worldwide – thanks to services that are available around the clock with comprehensive tracking options
- **Competence from experience:** always the best way – with nearly 100 years of airfreight expertise in a wide range of industries
- **The best advice:** contact us 7 days a week with your questions and bookings and for quick problem-solving

Innovation is taking off.

Quick, cool and on time.

The pharmaceutical and medical technology industries do not stop. This is why Lufthansa Cargo is continuously working on even better transport solutions for your industry, including our specially developed reflective foil that provides all Cool-Passive shipments with even better protection. Or the innovative Live Sensor – a tracking device that transmits information such as temperature, location, humidity, the effects of light, air pressure, vibrations, jolting and more, all along the transport route.
