

DGD.online – prepare
dangerous goods
documentation easily
online.

Stand: 05/2019 Lufthansa Cargo AG, FRA F/CI

DGD.online:

**All dangerous goods.
All modes of transport.
All in one tool.**

No matter whether you are shipping your goods by air, road or sea, with DGD.online you can easily prepare, edit, electronically sign and send, manage and archive the documents for almost **all dangerous goods** shipments online **anytime, from anywhere – and on any device.**

Our **versatile tool for dangerous goods documentation** lets you optimize your workflow and transport processes on a lasting basis to help you save valuable time, unnecessary errors and expensive transport delays.

Whatever your processes and supply chain look like, we have the right offer for your company.

The future is coming – with eDGD and DGD.online.

The digital Dangerous Goods Declaration, or eDGD, will soon make the paperless processing of dangerous goods shipments throughout the transport chain a reality. We are working on combining DGD.online and the eDGD to make it even easier for you to get your dangerous goods to their destination.

Online and easy:

Your benefits at a glance.

Fewer errors.

Get automatic validation of the data you enter. This helps reduce rejections that result in a higher workload and additional costs.

More productivity.

Optimize your processes: The user-friendly interface and automatic data validation make preparing DGDs significantly faster.

Lower costs.

Benefit from low costs, zero maintenance expenses and fewer follow-up costs due to re-checks and other measures.

Greater transparency.

Use a common digital workflow across locations and shifts, even with external logistics partners who do not have accounts of their own.

Increased flexibility.

Create and edit DGDs anytime, from anywhere, even on mobile devices – including electronic signatures.

Complete independence.

Use DGD.online independently of mode of transport and chosen airlines. Whether in the air, over land or at sea.

Top security.

Trust in the security offered by servers in Germany, accurate documentation and restricted access for qualified users only.
