

Enabling your global business

Automotive

Logistics for the automotive industry.

Reliable, safe, and around the world at top speeds: When it comes to logistics, the automotive industry has very rigorous and specific requirements – whether for planned shipments or in emergencies. And the quality of our solutions specifically tailored to your industry is high enough to meet those needs, including completely individualized charter solutions. With **Care** for dangerous goods, **td.Flash** for urgent production and replacement parts, or **Emergency.Solutions** for just-in-time exhibition deliveries, we secure your supply chain – and a flawless image at trade fairs and with customers.

Are you interested to see what kind of customized solutions for secret vehicles or race cars, prototypes for testing under extreme conditions or urgent replacement parts for luxury models can look like? Take a look at lufthansa-cargo.com/cargo-diaries to explore some of our customers' logistics highlights.

To your destination quickly and punctually.
Flying is reliable.

It pays to choose airfreight:

- Whether cars, replacement or production parts, whether to racing events, for presentation at a trade fair, or in the event of bottlenecks on the production line; Airfreight is the **fastest, most reliable solution**
- Thanks to sophisticated, state-of-the-art loading methods and numerous direct flights with minimal transfers, flying is the **most secure way** of avoiding damage during transportation
- Airfreight with a tailored Road Feeder Service is the **most effective way** to reach remote areas

Security by Lufthansa Cargo.
Flying provides real benefits.

You can rely on your vehicles, components and replacement parts reaching their destination quickly and securely, with our tailored combinations of products and services, professional handling and more.

- **Fast and flexible:** access to capacities at short notice, at the highest speed and priority – from the smallest replacement part to entire vehicles
- **Safety first:** Care, our special product for dangerous goods, complies with the IATA Dangerous Goods Regulations – e.g., for the transportation of lithium batteries and airbags
- **Stay cool:** climate-controlled transportation of prototype models containing clay elements with our special product Cool
- **Certainty through transparency:** monitored processes ensure seamless operations and improve planning certainty in case of disruptions at the destination
- **Tailored handling:** experience in the safe loading and flying of cars with special contours and fixing points, as well as secret cars and prototypes
- **Comprehensive documentation:** continuous shipment monitoring and password-protected shipment tracking in real time

Service by pros, for pros.
Flying can be so simple.

If you value quality, competence and customized logistics solutions, then we are the right choice for you.

- **More speed:** the quickest connections to over 300 destinations in 100 countries worldwide, including direct transfers and further transport on the ground
- **Highest quality worldwide:** smooth transport – through proper handling, precise timing and efficient processes at all locations
- **Reliability and transparency:** getting your cargo to its destination safely and on time and tracking it worldwide – thanks to services that are available around the clock with comprehensive tracking options
- **Competence from experience:** always the best way – with nearly 100 years of airfreight expertise in a wide range of industries
- **The best advice:** a team of specialists is available 24/7 to help you with your questions and bookings and to provide quick problem-solving

Innovation is taking off.
And your cars arrive safely.

We are always looking to continuously improve our offer for you. One example is our innovative method for securing cars by lashing around their tires, which prevents the wheel rims of valuable vehicles from being damaged. We also offer climate-controlled transportation. And coming soon, our toDoor direct delivery service will result in valuable time savings.
