

## Lufthansa Cargo offers four temperature ranges for the Products Passive Temp Support and Perishables

The following temperature ranges can be specified while booking our Products Passive Temp Support and Perishables:

- -20°C to -10°C FRO (Frozen goods)
- 2°C to 8°C COL (Cool goods)
- 15°C to 25°C CRT (Controlled Room Temperature)
- 2°C to 25°C ERT (Extended Room Temperature)

### Selected information regarding certain Product features

- *Warehouse:* Where available, shipments will be stored in the appropriate environment. Information about the facilities can be found on our [ePortal](#).
- *RFC:* Temperature-controlled trucks are visible during booking. However, it is not guaranteed that the truck's temperature setting will meet the booking temperature range in cases of conflicting temperature requirements with other shipments.
- *Flight:* Generally, the temperature is set according to the shipment's requirements. However, in certain circumstances, it may not be possible (e.g., AVI or if shipments with conflicting temperature ranges are at the same compartment). Temperatures lower than 0° C are not possible during the flight.

Products	Passive Temp Support	Perishables
Short Description	PAS provides a range of special processes, trained personnel and infrastructure for a best possible transportation of pharma shipments	PER is designed to fulfill the needs for temperature-controlled transportation of foodstuff and all other perishable goods
